COTTAGE OR MAY FLOWERING TULIPS

Cottage or May Flowering Tulips are, perhaps, the most permanent of all Tulips, blooming in early May after the Giant Triumphs have passed, hence the name, "May Flowering." The term "Cottage" is of recent origin, and so called because so many were planted around the country homes and cottages of England. As a class, they are rich in the more delicate and artistic shades of yellow, orange, fawn, salmon, old rose—colors missing to a great extent in other late Tulips. Planting directions are on every bag.

Cottage Tulips are as varied in their range of colorings as the Darwins but different in form, being mostly long and oval-shaped, many with gracefully reflexed petals. Stems are long and not so stiff as the Darwins or Breeders. Excellent for cutting and unsurpassed for garden decoration.

NARCISSUS OR DAFFODILS

In a general way, Daffodil and Narcissus mean the same thing; Daffodil is the common name and Narcissus, the botanical name. Common usage among garden makers in this country has applied the term Daffodil to the Giant Trumpet varieties, while the smaller or medium trumpet, as well as the Cluster-flowered and Poet's types, are referred to as Narcissus. Botanically, these smaller or medium trumpet Daffodils are the Barrii, Incomparabilis, Leedsii, Poeticus, Poetaz, Polyanthus and Miniature types. To avoid confusion, we are listing all of these classes as Daffodils.

Some gardeners apply the name Jonquil to the Giant Trumpet Daffodils, but this is misleading, as Jonquils are small flowered, sweet scented, have foliage of about the same thickness as width (rush-leaved), while all other Daffodils have flat or grass-like leaves. We are offering Jonquils and their hybrids as such and not as Daffodils.

We are listing the different classes separately, describing the distinguishing characters of each, and in so doing hope it will be of some help to you in selecting the varieties you want in your garden. Plant early this fall and enjoy their showy blooms next spring and for many years thereafter.

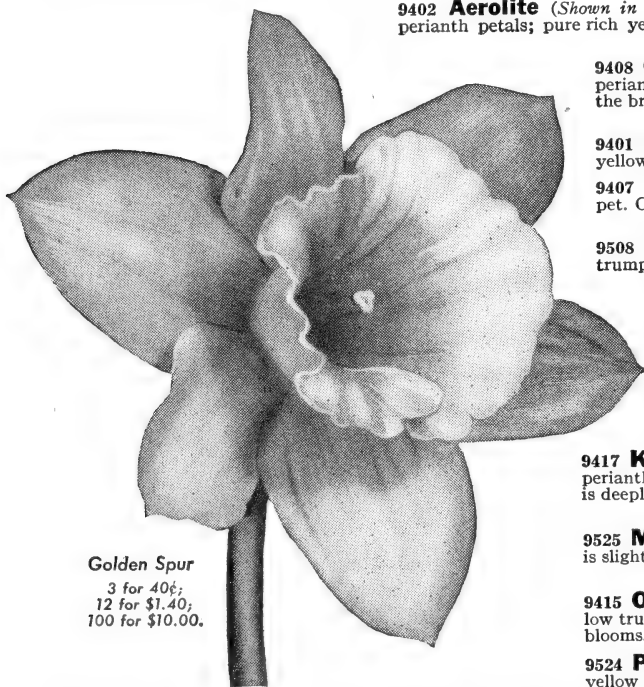

As Daffodils bloom early, last a long time, and may be had in so many lovely varied forms, they have few equals as garden flowers. They are most desirable for any garden purpose—in masses, in beds or borders, in groups of 12 or more here and there in the hardy perennial border, or in the foreground of shrubbery. For naturalizing in large quantities, no other flower is more suitable. Ideal, easily grown subjects for winter blooming in the house, especially the "Paper White Narcissus."

Short cultural directions for the growing of Daffodils indoors and outdoors are given on the opposite page; full directions are printed on every bag containing the bulbs.

GIANT YELLOW TRUMPET DAFFODILS

Flowers of the ever-popular Giant or, perhaps better named, Long Trumpet Daffodils, have trumpets as long as, or longer than, the length of the perianth petals. The flowers are freely borne on strong, stiff stems, 1 ft. or more high.

We offer below those varieties which have yellow, lemon or sulphur-colored trumpets and perianths of the same shade or lighter, but not white. *The trumpet is the funnel-like center; the perianth, the surrounding row of petals.*

HOW TO GROW DAFFODILS

Outdoors: For best results plant bulbs as early in the fall as possible, 4 to 8 in. deep and 6 to 10 in. apart; the exact distances depend on the size of the bulb and the nature of the soil. In very cold locations, after the ground is frozen hard, cover with leaves, straw or coarse litter to a depth of 4 to 6 in.

Indoors: Put several bulbs, about 1 in. apart (same variety), in a pot, barely cover the bulbs with soil, water thoroughly, and put in a cold-frame or heel-in in the garden for 8 to 10 weeks to force root development before bringing indoors for winter blooming.

MEDIUM TRUMPET DAFFODILS

On this and the next page we offer a choice assortment of Daffodils whose trumpets are not so long as the perianth segments. In this group, where the trumpet is greatly reduced in size and cupped, we refer to it as a "cup"; where trumpet is shortened but expanded or broadened, we call it a "crown."

The Medium Trumpet class is divided into three groups—Incomparabilis, Leedsii and Barrii. These divisions are based mainly on the relation of the perianth to the trumpet, crown or cup; an explanation is given under each group as to its distinguishing characteristics.

9551 Special Mixture Medium Trumpet Daffodils

Some of the most beautiful and graceful Daffodils are to be had in the Medium Trumpet group. For this mixture we have selected popular varieties of the Barrii, Leedsii and Incomparabilis classes in a wide and varied assortment of shapes, sizes, colorings of perianth petals, cups and crowns.

They include varieties with yellow perianth and yellow cup, with or without red coloring on the cup, as well as varieties with white or whitish perianth and self-yellow red-stained, or red cup. The most brilliant red crowned or cupped varieties will be found in the Barrii group.

JONQUILS AND CAMPERNELLES

Jonquils and their hybrids have a grace and charm that make them extremely popular. They are a distinctive type of Narcissus, the flowers being small, delightfully scented, and usually borne in clusters of two or more on strong stems. Foliage is erect and rush-like, being about the same thickness as width; other Daffodils have flat or grass-like leaves. They are perfectly hardy in the garden and highly recommended for beds, borders, naturalizing in woodlands, rock gardens, etc.; valuable for indoor culture in pots. Ideal for cutting, as the little flowers are of the greatest substance, keeping in perfect condition for a long time. Some gardeners apply the name "Jonquil" to the large trumpet Daffodils, but this is misleading. They are entirely distinct.

9479 Single Jonquil (Shown in color on the second cover.) The true, delightfully scented Jonquil with the fragrance of the honey locust. Each stem carries a cluster of 3 to 8 rich golden flowers. A gem. 15¢ each; 3 for 35¢; 12 for \$1.20; 100 for \$8.50.

9483 Golden Sceptre One of the finest of the new Jonquil hybrids. Flowers are deep Jonquil-yellow, 3 in. or so across. The perianth is star-shaped, just a shade lighter in color than the trumpet, which is slightly rolled and flaring at the brim. Ideal for garden and cutting. 15¢ each; 3 for 35¢; 12 for \$1.20; 100 for \$8.50.

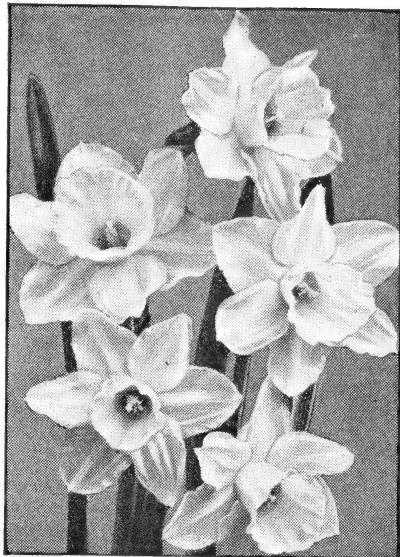

9565 Tullus Hostilius New type of Jonquil hybrid; flowers as large as some of the smaller sized trumpet Daffodils. Of the Jonquil-yellow trumpet type, with usually three flowers to a stem which are produced in the greatest profusion. They are perfect in every respect. An ideal variety for garden display, house culture or cut-flower use. 18¢ each; 3 for 45¢; 12 for \$1.50; 100 for \$10.50.

Paper White Narcissus

POLYANTHUS NARCISSUS

Popular for growing in the house during the winter and early spring, either in soil or in pebbles and water

One of the easiest flowers to grow. Best results are obtained if your first plantings are not made until after October 15. To have a continuous display, make successive plantings two or three weeks apart. We suggest you order enough bulbs early, as they will keep in perfect condition if put in a cool, dry cellar or spare room until needed for planting.

Water Culture: Put an inch or two of sand or pebbles in bottom of dish; set the bulbs upright and place sufficient pebbles around them to hold them in place. Fill dish with water and set in a dark, cool room until plenty of roots have formed, after which bring to a light but cool, free from frost, place. Polyanthus Narcissus may also be grown in soil. **They are not suited to garden planting** except in frostless localities.

9460 Paper White Grandiflora

The Fragrant White Narcissus

The large, pure white blooms are borne in clusters and are highly prized for their beauty, fragrance, and the ease with which they can be grown. This accounts for their universal popularity. (Shown in color on third cover.)

EXTRA LARGE BULBS: 12 for 70¢; 100 for \$4.75; 250 for \$11.00.

9459 Soleil d'Or—Golden Yellow Narcissus

Often called the "Yellow Paper White," the sweet-scented blooms being rich golden yellow with a deep orange-red cup. May be grown, like Paper Whites, in water and pebbles, but do best when grown in soil.

LARGE BULBS: 3 for 70¢; 12 for \$2.50; 100 for \$18.00.

MINIATURE NARCISSUS OR DAFFODILS

Fine subjects to naturalize in the rock garden or in shaded woods. Plant bulbs $2\frac{1}{2}$ to 3 in. deep and 3 to 6 in. apart. MARIPOSA TULIPS

Calochortus

(Shown in color on third cover.)

"Mariposa" means **butterfly** in Spanish, and is applied to these Tulips because the "eyes" and markings on the gorgeously colored flowers are so much like those on the wings of a butterfly. Flowers are cup-shaped and of wonderful colors, many marked with dots and penciling. They are borne one or more to a stem during May and June. Bulbs are small and should be planted $2\frac{1}{2}$ to 3 in. deep and 3 to 6 in. apart. In cold sections give bed a surface covering of several inches of straw or strawy manure after the ground has become frozen.

9382 *Clavatus* The bowl-shaped blooms, often over 4 in. across, are deep golden yellow without markings, the lower half being covered with stiff yellow hairs. The largest flowered, stoutest stemmed Mariposa Tulip. 3 for 40¢; 12 for \$1.40; 100 for \$10.00.

BULBOUS IRIS

A glorious display of blue, white, bronze, and yellow flowers in June if you plant the bulbs of these beautiful Iris early in the fall. Flowers are suggestive of Orchids. It is their nature to root early and often make top growth in December. Flowers are prized for cutting.

EASTER LILIES

Popular throughout the world, loved and admired by everyone. We offer two varieties that are ideal for indoor growing—the Bermuda and the Giant Easter Lily. Use a 5- or 6-in. pot; place bulb loosely in rich, porous soil so that it is barely covered and the soil gently but firmly set. Keep in a cool, dark but airy place, free from frost, until bulbs are well rooted; afterward bring to the light and grow on in a temperature of not more than 60° F. Ideal garden subjects in frost-free locations.

Bermuda Easter Lily

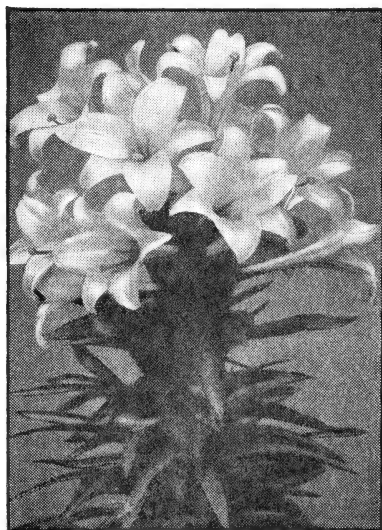

Large Bulbs: 50¢ each; 3 for \$1.35.
Extra Large: 60¢ each; 3 for \$1.65.

Bermuda Easter Lily (Lilium Harrisii)

Quick to come into bloom; may be forced for Christmas, but it is for Easter that it is so extensively planted. The plants grow about 3 ft. tall and produce 5 to 12 or more large, trumpet-shaped, fragrant, waxy white blooms with contrasting yellow anthers. Our bulbs are genuine Bermuda grown and in normal times usually reach us in August and are available from then until December.

8602 LARGE BULBS: As a rule, they produce 5 to 10 large flowers per plant. 50¢ each; 3 for \$1.35; 12 for \$5.00.

8601 EXTRA LARGE BULBS: Will produce taller plants with more flowers per stem than the large bulbs. 60¢ each; 3 for \$1.65; 12 for \$5.75.

Giant Easter Lily

60¢ each; 3 for \$1.65; 12 for \$5.75.

8612 Giant Easter Lily (Lilium longiflorum giganteum)

The fragrant, trumpet-shaped flowers are of the purest white and the largest of all Easter Lilies. The plant is of sturdy, stocky growth and largely forced for Easter, but is just as valuable for later flowering. Bulbs are usually ready for shipment in late October. Easter Lilies, after having bloomed in the house, may be planted outdoors for flowering during the late summer. 60¢ each; 3 for \$1.65; 12 for \$5.75.

Bulbs of Burpee's Hardy Lilies are listed on page 18.

The bulbs offered on this and the previous page are not hardy, so must be grown indoors except in frost-free locations. With the exception of Bermuda Easter Lilies, all bulbs listed in this book are American grown and guaranteed to produce satisfactory results or your money will be refunded.

HARDY GARDEN LILIES

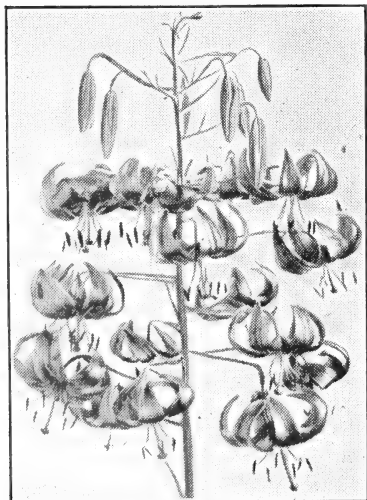

Easy to grow in any good, well-drained garden loam to which has been added a generous quantity of leaf mold. Once established, they will increase in beauty each year. Most all lilies delight in a sunny location, but mulch so that the hot sun does not reach the soil around the base of the plant. All varieties offered are highly decorative in the border, while the dwarfier ones also give a charming touch of beauty to the rock garden. Lily bulbs differ greatly in size according to variety, some 1 in. across, others 3 in. or more; we supply the sizes which will give the best results. We do not recommend Hardy Lily bulbs for house culture.

Regal Lily (Shown in color on third cover)

Giant Fancy Pansies

Pansies always have been a great specialty with us and we are justly proud of the quality and trueness to type of our strains. For early spring display, sow seeds in the summer, early enough so that the seedlings, transplanted in the fall, will reach an almost ready-to-bloom stage before winter sets in. Carry the plants over winter in frames or outdoors, depending on the locality in which you live. For full cultural directions, telling how to grow pansies over the winter, ask for a free copy of leaflet No. 24A.

BURPEE'S ANNUAL FLOWER SEEDS

for Fall Sowing

Seed of many annuals sown outdoors in early fall before frost usually produce not only larger plants with more and better flowers than spring-sown seed but they also bloom earlier. The seed of some classes will germinate in the fall; the young seedlings should be given winter protection in very cold localities. Seeds of others may lay dormant in the soil until spring, when they will germinate and begin growing long before you could sow outdoors at that time of the year. We have selected the varieties that we have found by tests at Fordhook Farms to be best adapted for fall sowing.

BURPEE'S PERENNIAL FLOWER SEEDS

Perennial Flowers are the hardy, permanent ones that live for years. In frost-free sections, seeds may be sown at almost any time of the year; in mild climates or in localities where winters are not too severe, seeds may be sown in the fall—the earlier the better—so that plants will be of good size before freezing weather sets in. After the ground is frozen hard, cover the bed with a light mulch of straw or strawy manure to prevent the plants from being heaved out by alternate freezings and thawings. Cultural directions are given on every bag containing the seeds. The Burpee leaflet, "L-26, Perennials from Seed," sent **Free** upon request. Heights and blooming season given in the descriptions are average; they may vary in different localities and under different weather and soil conditions.
